BS Computer Science student specializing in MERN stack development with hands-on experience building full-stack web and mobile applications. Recently completed a government-certified AI course covering Machine Learning, Deep Learning, and NLP. Passionate about writing clean code and turning ideas into working applications.

EXPERIENCE

React Native Developer Intern

Explorer Bees | Jul 2025 – Oct 2025 | Hybrid

- Engineered cross-platform mobile and web apps using React Native, React.js, Node.js, MongoDB, and Prisma
- Led development of production apps: Weather App, FoodPanda Clone, and Cricket Live Score App
- Built and integrated RESTful APIs ensuring seamless data flow and optimized backend performance
- Delivered responsive, scalable UIs with consistent experience across Android and iOS

React.js Developer Intern

Alphinex Solutions | Jul 2025 – Oct 2025 | Onsite

- Developed Next.js and React.js web apps with integrated Node.js backend services
- Built reusable frontend components improving UI scalability and performance
- Contributed to Smart Stock Management System, Daraz Clone, and Amazon Clone projects
- Supported deployment workflows and gained hands-on production hosting experience

PROJECTS

Sentiment Analysis Web App May 2026

- Full-stack app with React.js and Flask classifying text as positive, negative, or neutral in real time
- Trained NLP model using Scikit-Learn and NLTK with TF-IDF, achieving over 85% accuracy

Student Performance Predictor Apr 2026

- ML web app using Python, Scikit-Learn, and React.js to predict exam scores
- Compared Linear Regression, Decision Tree, and Random Forest; deployed Flask API with MongoDB

Community Connect Jan – Mar 2025

- Full-stack social platform with React, Node.js, Express.js, and MongoDB
- Implemented authentication, group management, and real-time chat via WebSockets

Skill Swap Oct – Dec 2024

- MERN platform enabling users to list skills, manage sessions, and process secure payments

Movie Ticket Booking System Apr 2025

- CLI cinema booking app with Python and MySQL using a 5-entity relational database
